Subject: How about this

Klaus,

I think I've got it. Reading Anita's message I can understand her distress. She has worked hard on the book is very proud of the result but now the cover of the book makes the false statement to the world that someone else made a greater contribution than she did. Here's how fix it: For the cover we print a sticker (with some banner or other advertising hype) that also states the author list. This is what it says:

by  
Anita Flynn  
and  
Joe Jones  
with  
Bruce Seiger

EXHIBIT      ##

Giving Anita more than what she is asking for in this point I believe will make all other negotiations easier. We can also include an errata sheet to account for Anita's other objections. What do you think?

Joe
